

Sponsorship Info

The Urbana Park District houses a number of education animals at the Anita Purves Nature Center. Most have injuries that would compromise their survival in the wild, or were hatched in captivity and are non-releasable. All of the animals are on exhibit and are featured during educational programs with schools, scouts, and the general public.

Sponsorship is a great way to support environmental education in Champaign County. This program generates funds for the care, housing, and feeding of the center's education animals. By sponsoring an education animal at the Anita Purves Nature Center, you help to provide for the care of that animal.

When you sponsor an animal, you gain a special friend at the nature center while lending support to environmental education. Sponsorships are also a great gift to friends, a group like a scout troop, a classroom, or a family. Sponsorships are available for one, six, or twelve months.

Sponsor an Education Animal

Anita Purves
Nature Center
